ON ATTACKING THE PIN

LAUNCHER UHX IRONS

How would you like to have one complete iron set that offers both distance and control? Now you can with the new Launcher UHX Irons from Cleveland Golf, our most progressive combo set of irons ever. With hollow long irons and cavity back short irons, get distance, precision and everything in between. Launcher UHX Irons. *Step Up, and Launch It.*

LAUNCHER UHX IRONS

ONE COMPLETE IRON SET

Hollow or cavity back? Distance or control? Selecting the right iron set can be difficult and force you to make a choice between hollow or cavity back irons.

Now, you don't have to choose. The all-new Launcher UHX Irons are the most progressive combo set of hollow and cavity back irons on the market.

Explosive speed. Pinpoint control. Launcher UHX Irons give you distance where you want it and precision where you need it.

All in one comprehensive iron set.

HOLLOW AND CAVITY BACK DESIGN

The Launcher UHX Irons deliver a completely new way to approach one complete set of irons. Players who prefer the look of a traditional iron but prefer the forgiveness of a hybrid will find the perfect blend of distance and accuracy with UHX long irons. In the scoring clubs, the cavity back design allows avid golfers to maximize their scoring capabilities and improve their shots into the green.

DISTANCE. PRECISION. FORGIVENESS.

Hollow construction in the 4-iron through 7-iron provides more distance and forgiveness with lower and deeper weighting compared to traditional cavity back irons.

Cavity back construction in the 8-iron through pitching wedge focuses on attacking the pin and proximity to the hole rather than maximizing distance.

Launcher UHX Irons incorporate a seamless transition from hollow long irons to cavity back scoring irons, creating one unified iron set.

V-SHAPED SOLE

Featuring the latest iteration of our V-Shaped Sole design, the Launcher UHX Irons cut smoothly through the turf for crisp, consistent contact, strike-after-strike. Progressively implemented throughout the full iron set, the V-Shaped Sole offers added forgiveness and improved speed retention for better distance control when attacking the pin.

BETTER STRIKES, BETTER RESULTS

Progressively implemented in the Launcher UHX Irons, the V-Shaped Sole provides better speed retention and turf interaction to help maintain ball speeds at impact.

The hollow series (4i-7i) irons feature a less distinct V-Shaped Soles for more forgiveness and improved ball speeds. Meanwhile, the cavity back irons feature a more pronounced V-Shaped Sole for more bounce and better turf interaction in the scoring clubs.

UHX HOLLOW 4I
Wider sole, less V-Shape

UHX CAVITY BACK 8I
Thinner sole, more V-Shape

HIGH STRENGTH, VARIABLE STEEL FACE

Enhanced for more distance, the Launcher UHX Irons are designed to provide more distance and forgiveness in the clubs you need it most. With that in mind, a high strength steel face delivers higher ball speeds across the entire face of the Launcher UHX Irons to maintain your power and distance on off-center impacts.

HOTTER, STRONGER STEEL FACE

Featuring the same high strength HT1770M steel face used in the Launcher HB Turbo Fairway Woods and Launcher Halo, the Launcher UHX 3-iron through 7-iron utilize a variable face design for higher ball speeds across the entire face, including off-center strikes.

New variable face insert
delivers more speed on
every shot.

SPIN

The key to distance control and sticking it close is generating spin. The Launcher UHX Irons feature our proprietary Tour Zip Grooves and enhanced Laser Milling for consistent spin when attacking the pin.

TOUR ZIP GROOVES

Cleveland Golf has dominated spin performance for nearly a decade. And one of the keys to improving your iron play is generating spin on approach shots for consistent distance control. Featuring our milled Tour Zip Grooves and finite Laser Milling, each face within the Launcher UHX Irons is crafted to deliver more spin and more stopping power from everywhere on the course.

CLEVELAND LAUNCHER UHX IRONS

The Launcher UHX Irons deliver the perfect blend of distance and accuracy. Featuring hollow long irons for explosive distance and cavity back short irons for ultimate control, launch it with the new Cleveland Launcher UHX Irons.

KEY INNOVATIONS:

HOLLOW AND CAVITY BACK CONSTRUCTION

Hollow long irons provide more forgiveness with lower, deeper weight distribution, while cavity back short irons provide more control when attacking the pin.

VARIABLE HIGH STRENGTH STEEL FACE

A variable high strength HT1770M steel face insert delivers explosive ball speeds for increased distance, even on heel and toe impacts.

V-SHAPED SOLE

Featured in both the cavity back and hollow designs, the V-Shaped Sole improves turf interaction for better speed retention at impact.

TOUR ZIP GROOVES

Tour Zip Grooves and Laser Milling deliver maximum spin for optimal control throughout the Launcher UHX Irons.

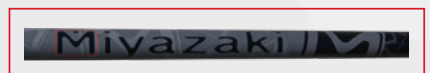

MODEL	LOFT	LENGTH	LIE ANGLE	OFFSET (mm)	STEEL SW	GRAPHITE SW

CLEVELAND LAUNCHER UHX UTILITY IRONS

The Launcher UHX Utility Irons deliver the distance and forgiveness of a hybrid in a compact, iron-like address profile. With the Launcher UHX Utility Irons, get total control and more ball speed off the tee or from the fairway.

KEY INNOVATIONS:

HOLLOW CONSTRUCTION

Featuring a hollow-body construction, these utility irons deliver more distance with additional forgiveness compared against traditional irons.

VARIABLE HIGH STRENGTH STEEL FACE

A variable high strength HT1770M steel face insert delivers explosive ball speeds for increased distance, even on heel and toe impacts.

V-SHAPED SOLE

Featured in both the cavity back and hollow designs, the V-Shaped Sole improves turf interaction for better speed retention at impact.
