

A close-up, artistic rendering of a Srixon UltiSoft golf ball. The ball is white with a dimpled texture and a prominent teal stripe. The background is a solid teal color. The Srixon logo is in the top right, and the product name 'ULTISOFT' is on the ball's stripe.

SRIXON®

ULTISOFT
PRODUCT MANUAL

ULTIMATE SOFTNESS

UltiSoft is true to its name as the ultimate golf ball for softness and feel. It's the lowest compression ball in our lineup, delivering unmatched performance on every strike.

And now, thanks to FastLayer Core, UltiSoft's off-the-tee performance just got longer. If low compression is number one on your priority list, you can't beat UltiSoft's incredible feel and powerful distance.

ULTIMATE SOFTNESS **ULTIMATE FEEL**

THE ALL-NEW ULTISOFT.

UltiSoft is true to its name as the ultimate golf ball for softness and feel. It's the lowest compression ball in our lineup, delivering unmatched performance on every strike. And now, thanks to the FastLayer Core, UltiSoft off-the-tee performance just got longer.

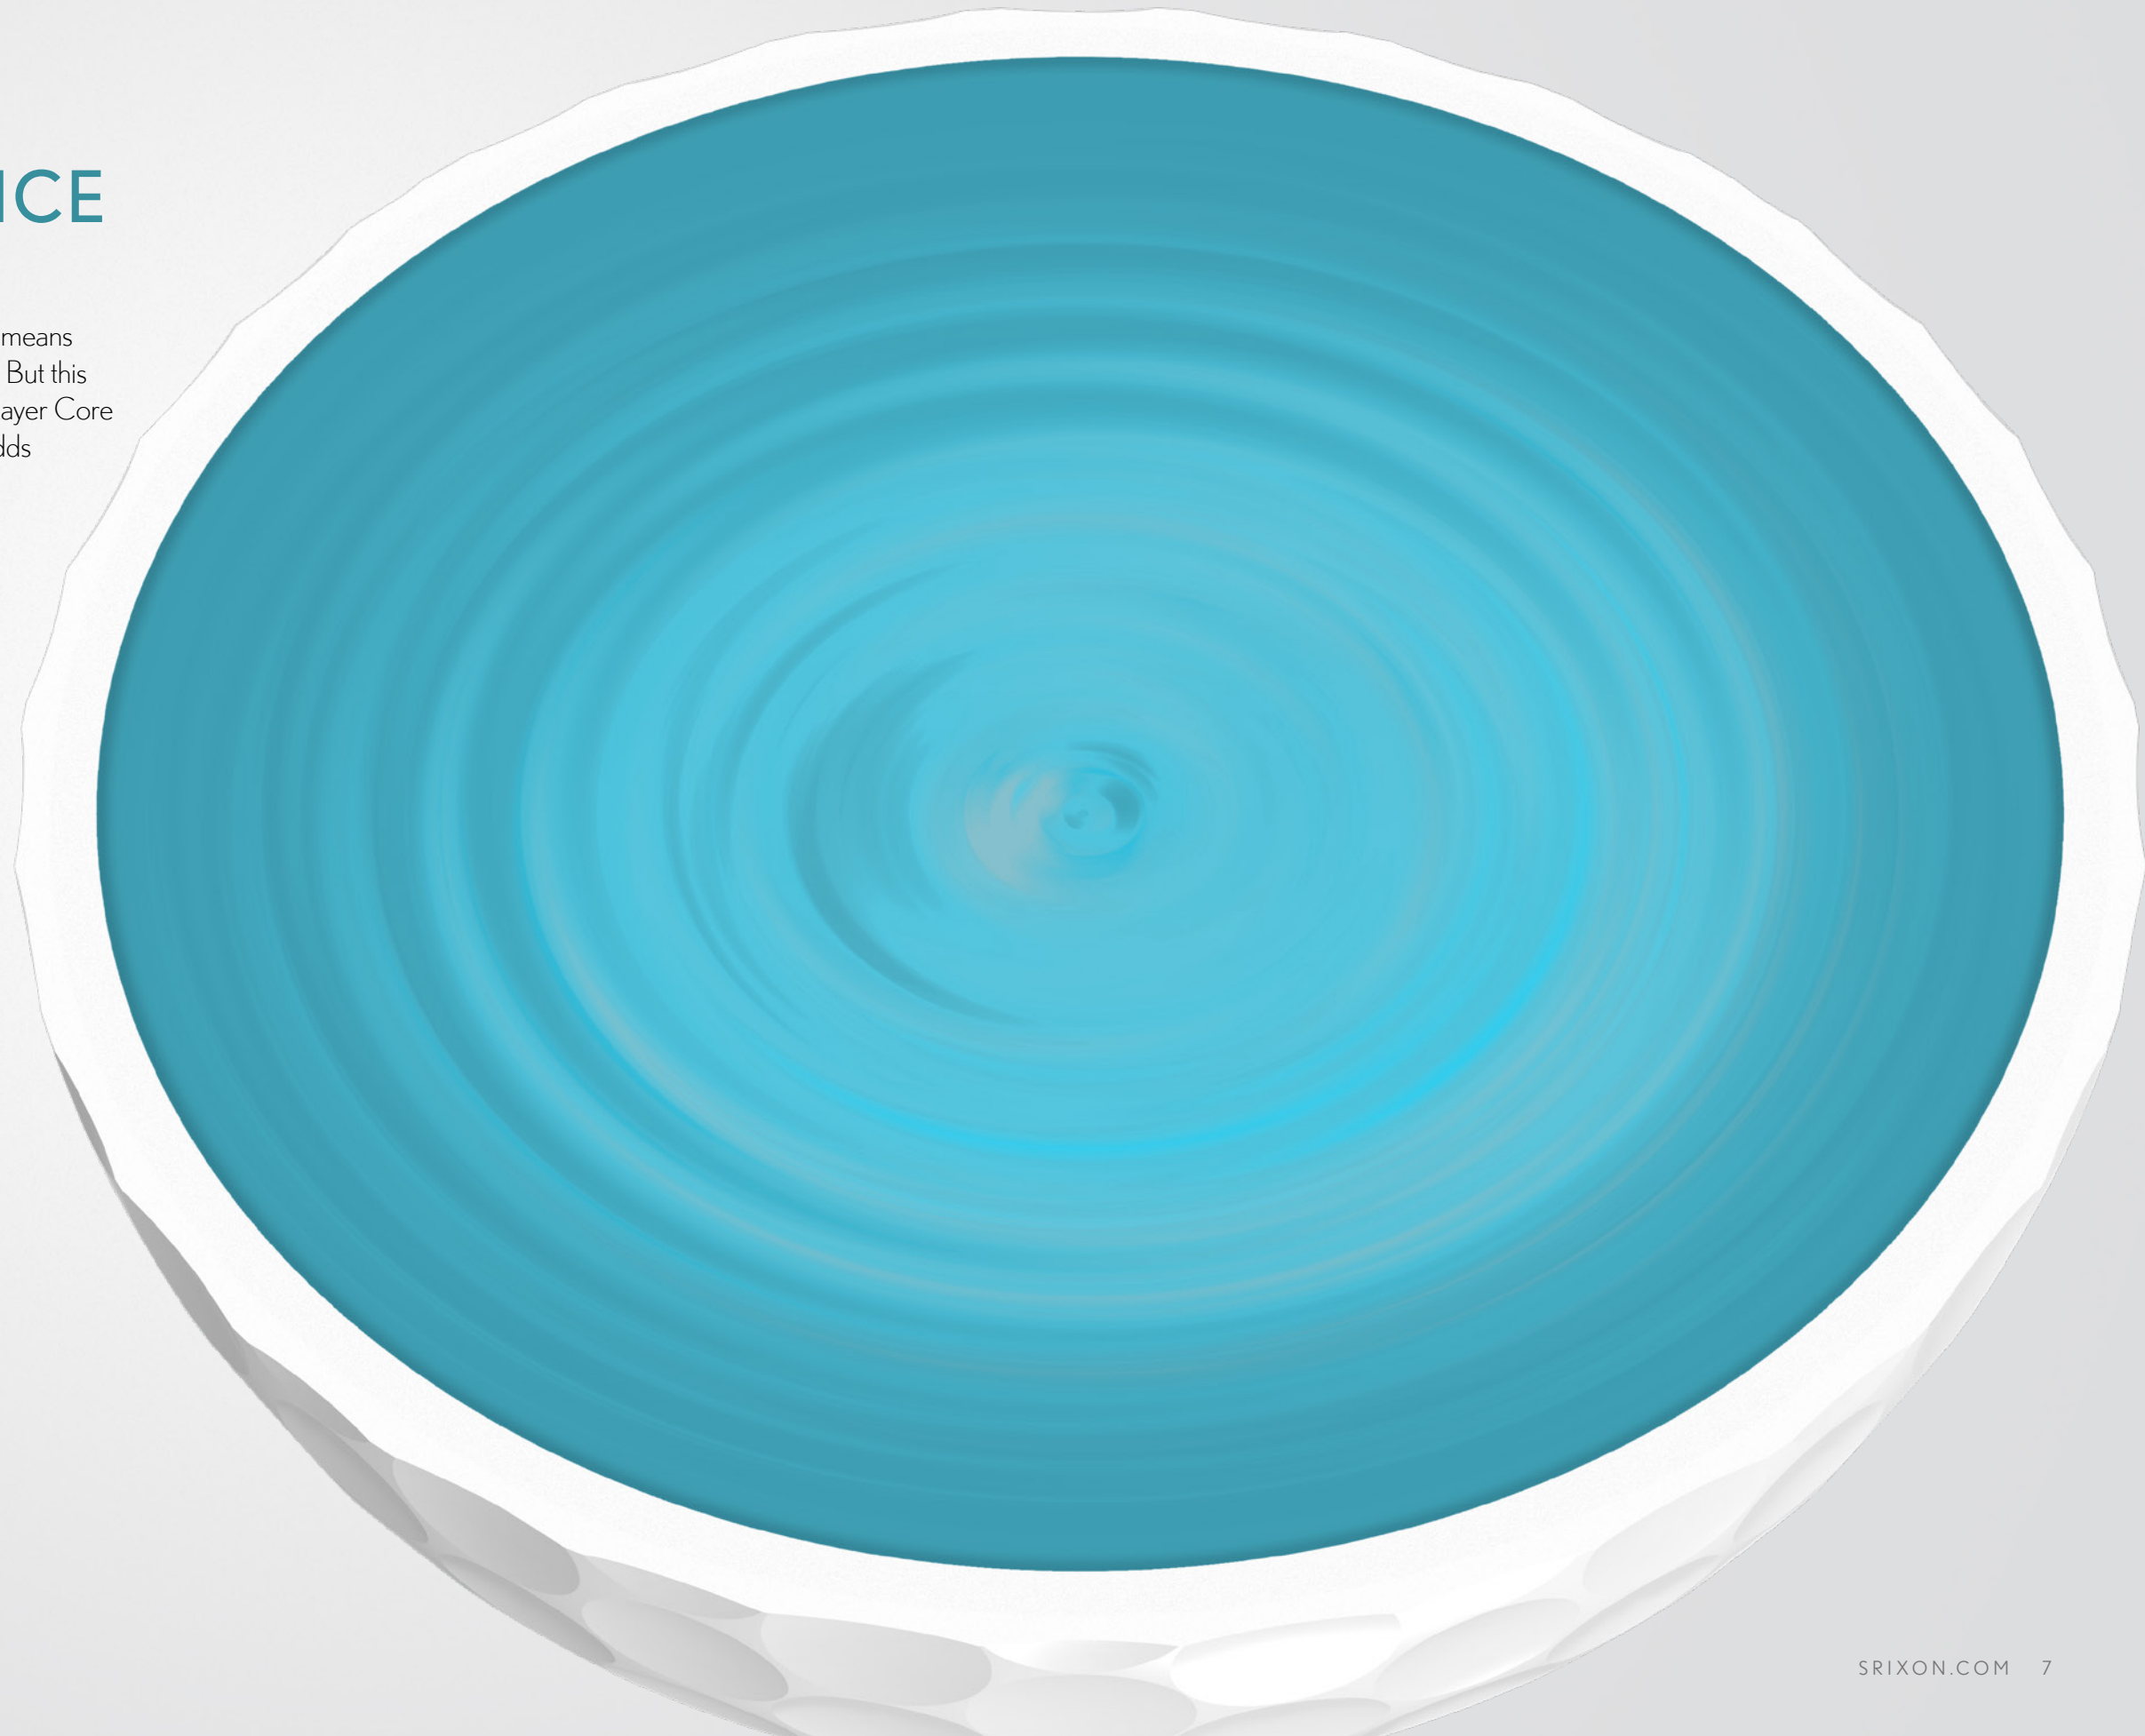

THE ALL-NEW ULTISOFT

ALL FEEL, ALL DISTANCE

FastLayer Core

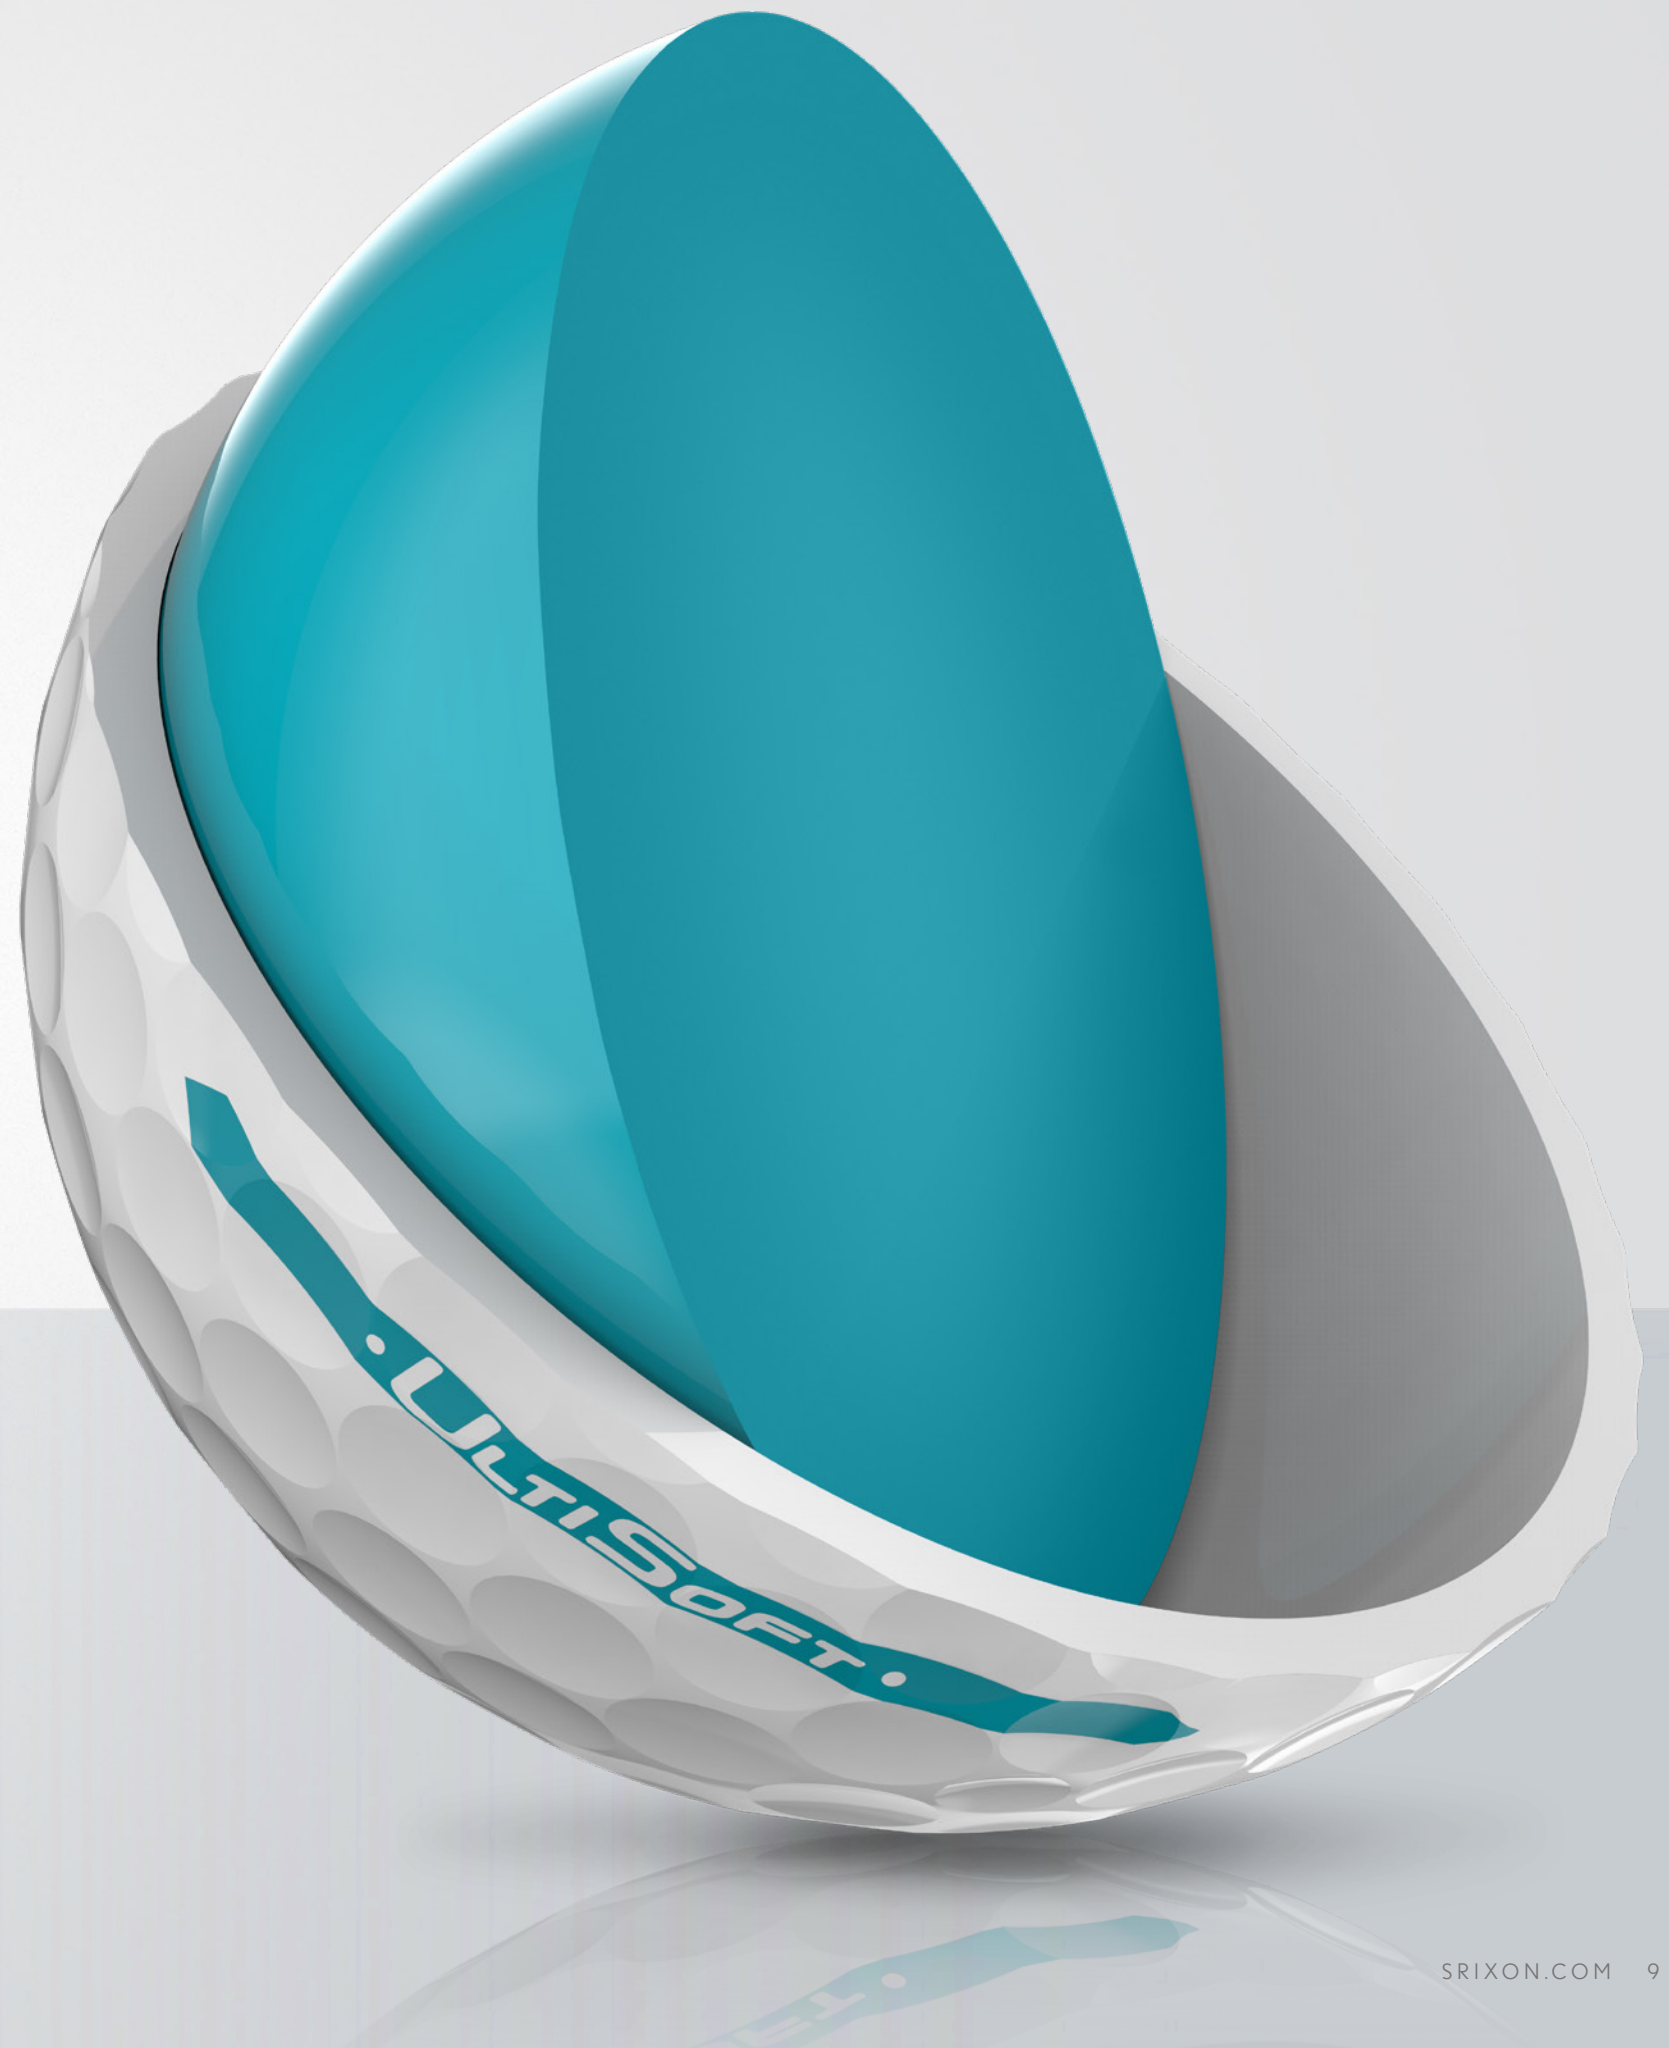

UltiSoft is our softest golf ball. That means truly unmatched feel on every shot. But this latest generation features our FastLayer Core technology, a unique design that adds distance while maintaining that signature softness.

Feel and Distance Without Compromise

FastLayer gradually transitions from soft inner core to firm outer edge, so it behaves like a core with thousands of layers, giving you distance and great feel without compromise.

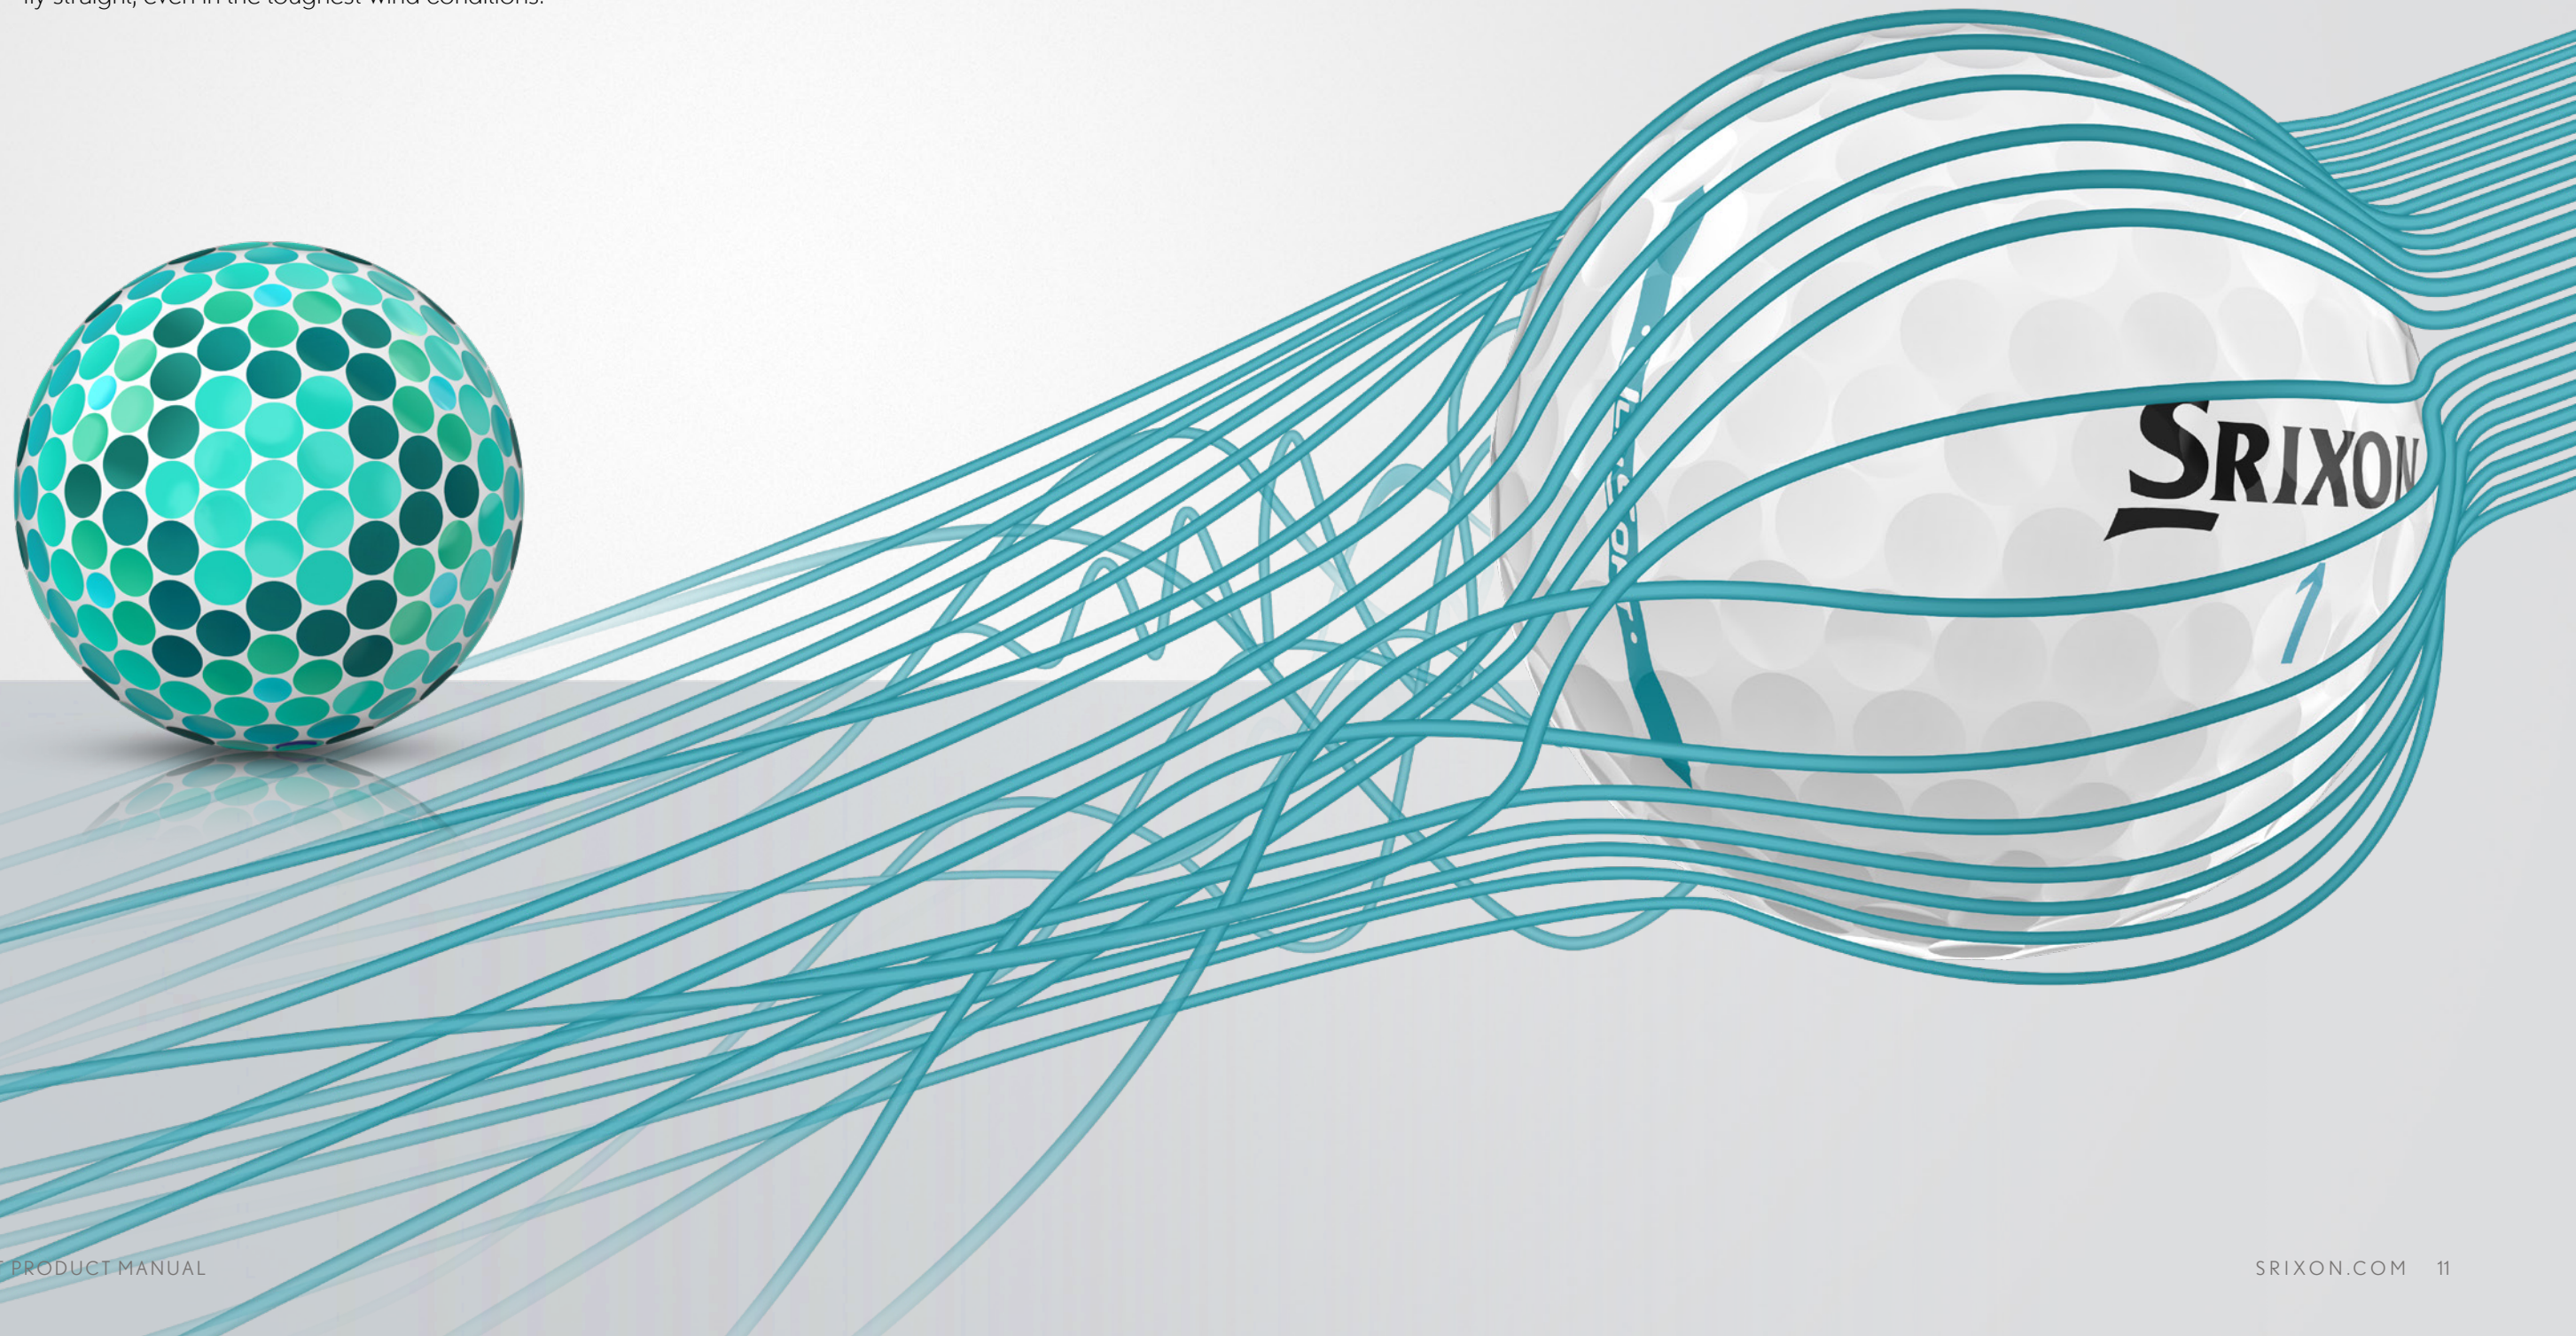

The new UltiSoft features our softest FastLayer Core. It's maximum softness with powerful distance.

DEFY DRAG

338 Speed Dimple Pattern

The 338 Speed Dimples featured on UltiSoft improve overall aerodynamics for better flight performance with drivers, woods, and irons. With just the right combination of dimple uniformity and dimple occupancy, the Speed Dimples boost distance and fly straight, even in the toughest wind conditions.

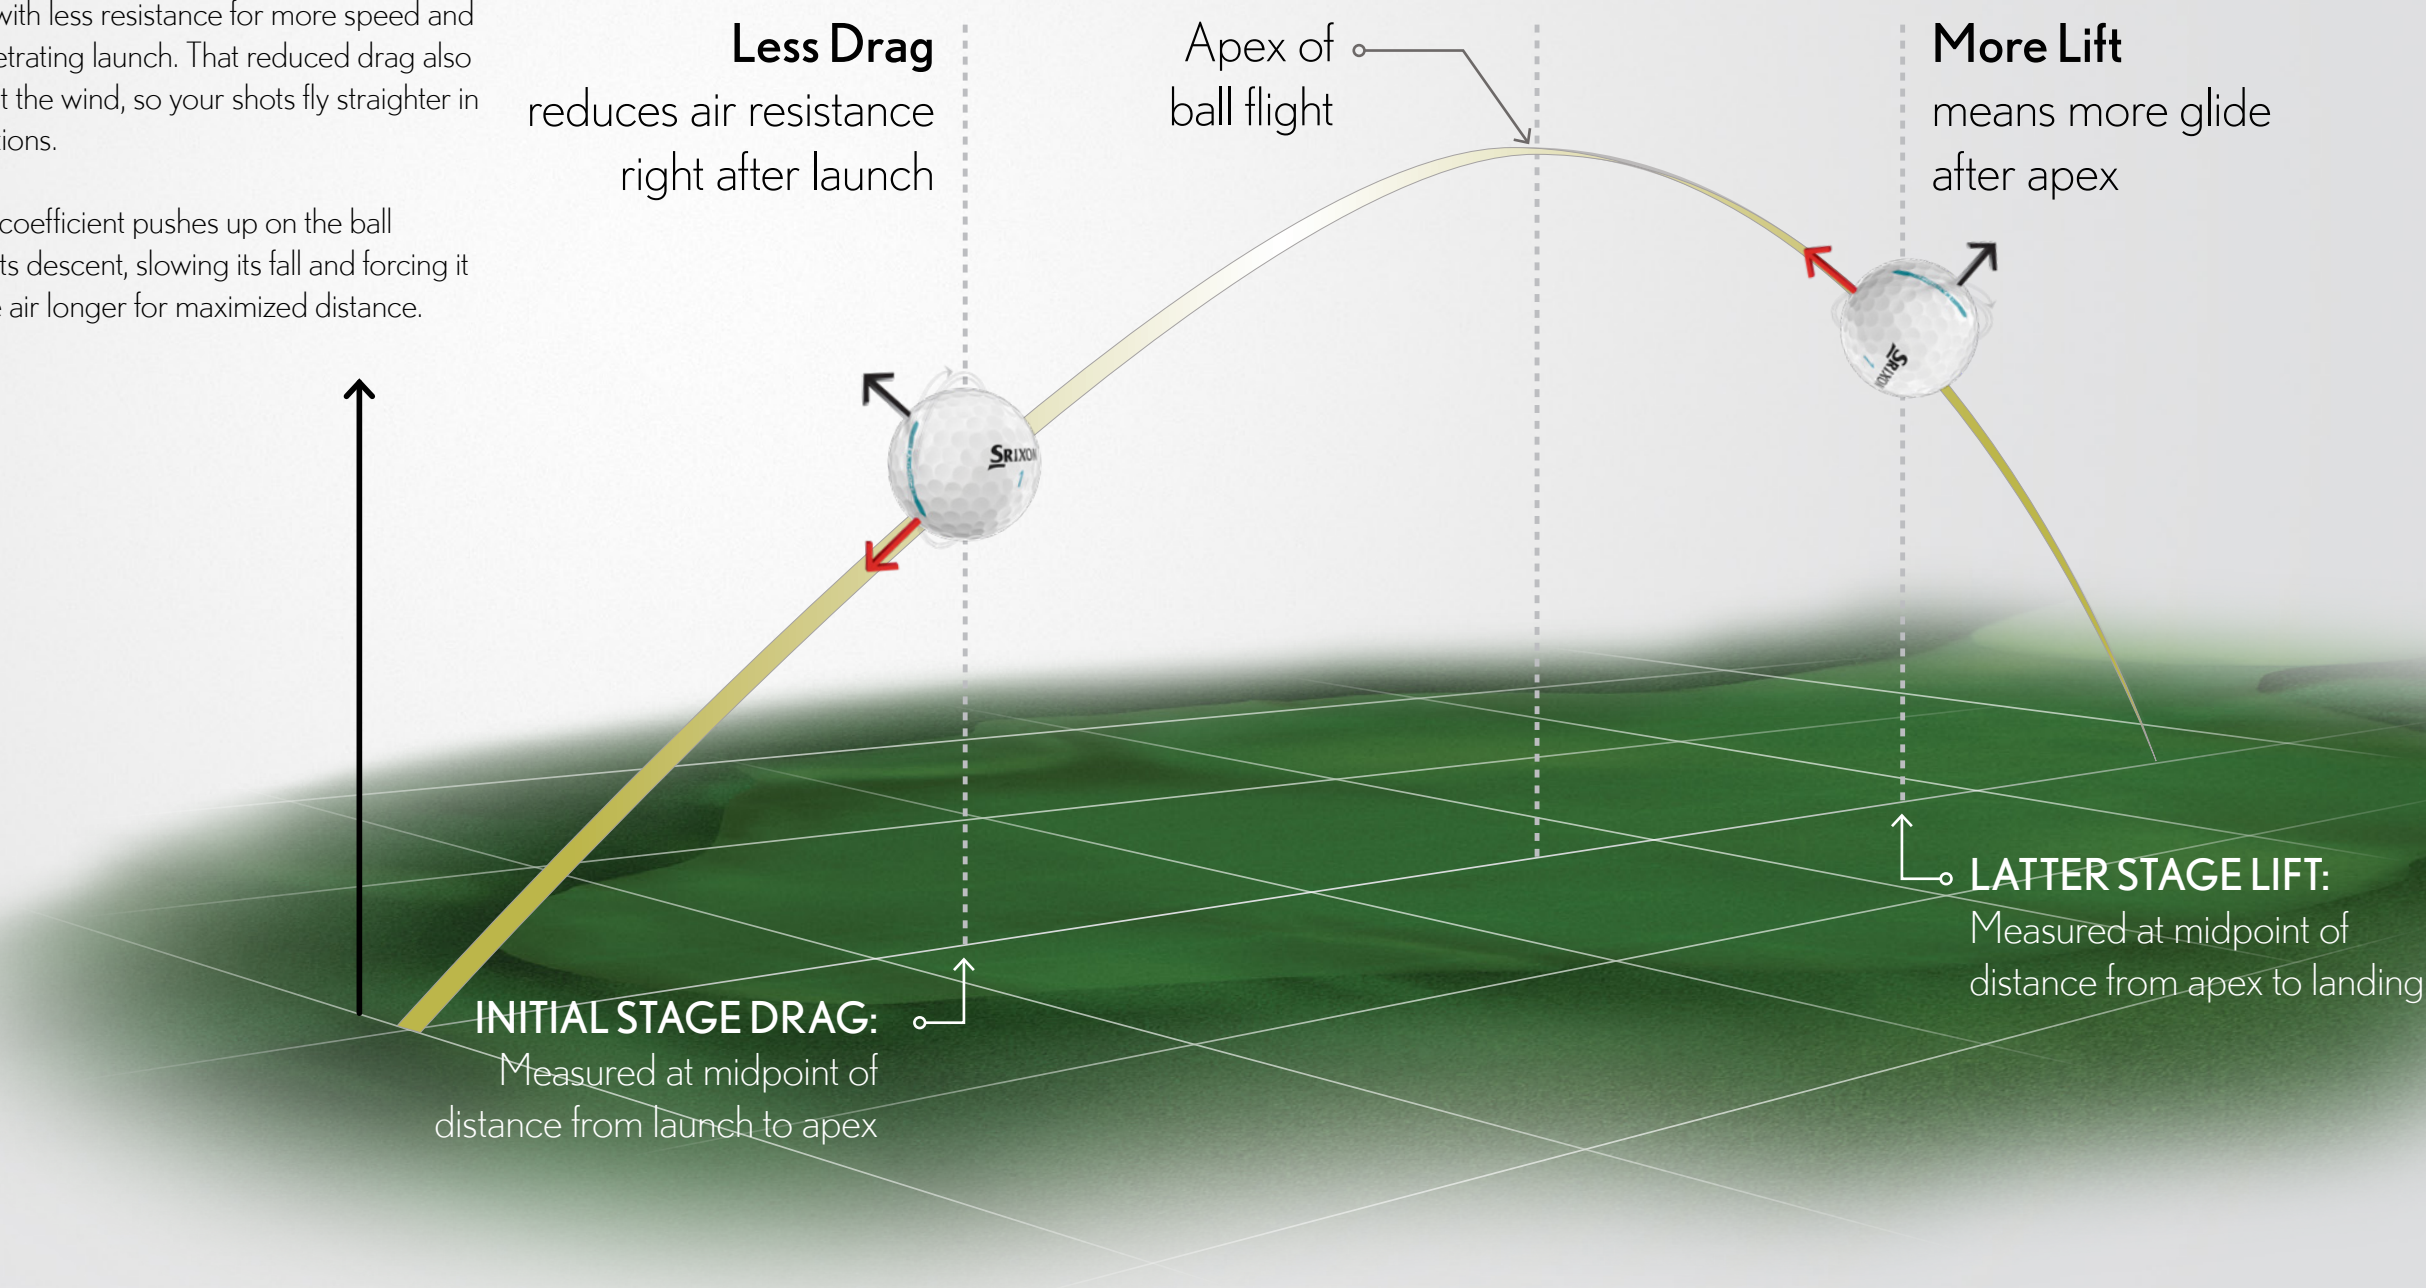

Fly Farther and Cut Through Wind

Speed Dimples reduce drag and increase lift, creating just the right aerodynamic conditions for maximum flight distance.

A lower drag coefficient means the ball cuts through air with less resistance for more speed and a more penetrating launch. That reduced drag also fights against the wind, so your shots fly straighter in harsh conditions.

A higher lift coefficient pushes up on the ball throughout its descent, slowing its fall and forcing it to stay in the air longer for maximized distance.

ULTISOFT

UltiSoft is true to its name as the ultimate golf ball for softness and feel. It's the lowest compression ball in our lineup, delivering unmatched performance on every strike.

FastLayer Core

With a soft center that gradually transitions to a firm outer edge, the FastLayer Core gives UltiSoft incredible softness and great distance off the tee.

338 Speed Dimple Pattern

To get more distance overall and better performance in the wind, Speed Dimples reduce drag at launch and increase lift during descent.

Soft, Thin Cover

Provides more greenside spin and softer feel on all pitches, chips and putts.
