

ZX IRONS

PRODUCT MANUAL

SRIXON®

CULMINATED

You can't attain better with short-term thinking. Real progress is a culmination of every triumph, every mistake, every hard-earned lesson going back to the start.

ZX is our greatest achievement not because it is different from our past but because it is our past, and our future, expressed here and now. Experience it and allow decades of creativity, expression, and ingenuity to bring about your best iron play yet.

ZX5 IRONS

ZX7 IRONS

ZX4 IRONS

ZX UTILITY

BEAUTIFUL POWER

NEW **ZX IRONS**

Striking design meets explosive speed. These are beauty, and power, in equal measure.
Introducing the forged ZX Irons from Srixon. *BUILT FOR DISTANCE.*

CUTTING- EDGE

The line between human and machine is blurring. Artificial intelligence puts breakthroughs on the fast track but a tool is only as good as its craftsman. When talent, attention to detail, and state of the art come together, our best work gets done.

ZX5

ZX7

ZX4

ZX UTILITY

MAINFRAME

Created with human intelligence yet perfected by the artificial kind, MainFrame is a one-of-a-kind face design that increases ball speed on every shot. While our engineers set the parameters, our computers ran the simulations—thousands of them—until we had our fastest irons yet.

AUTOMATED INTELLIGENT DESIGN

Milled into the backside of our iron faces, MainFrame is a variable thickness pattern made up of grooves, channels, and cavities. Our automated intelligent design software slowly and meticulously iterated the exact dimensions of these features, thousands of times over. This state-of-the-art, proprietary process uses artificial intelligence and machine learning to create, test, and improve face designs, based on the parameters set by our engineers.

After two years of learning and refining, these final faces offer greatly improved COR because they maximize flex at impact. That's more ball speed and more distance for you on every iron shot.

Take your iron game from 'cautious' to 'confident.' Swing hard, go for the long shot, and play like you're a club closer to every green. Because with MainFrame, you are.

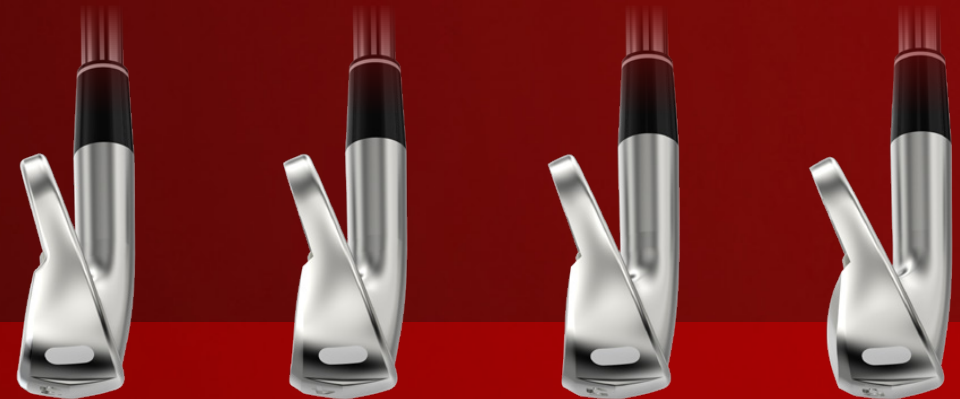

ZX5

FAST. SOFT. POWERFUL.

ZX5 combines pioneering ball speed technology with premium forged feel, and delivers all of it in a forgiving yet workable chassis that's razor sharp at address. Balanced and thoughtful, these irons are the best of all worlds.

If you're after irons with forgiveness where it counts, control when you need it, soft forged feel, and explosive distance, then ZX5 is your ultimate set.

7-PW

AW (Not Shown) is also available

MAINFRAME

Created with human intelligence yet perfected by the artificial kind, MainFrame is a one-of-a-kind face design that increases ball speed on every shot. While our engineers set the parameters, our computers ran the simulations—thousands of them—until we had our fastest irons yet.

Milled into the backside of each ZX5 face, MainFrame is a variable thickness pattern made up of grooves, channels, and cavities. This pattern maximizes COR for more ball speed and incredible distance on every shot.

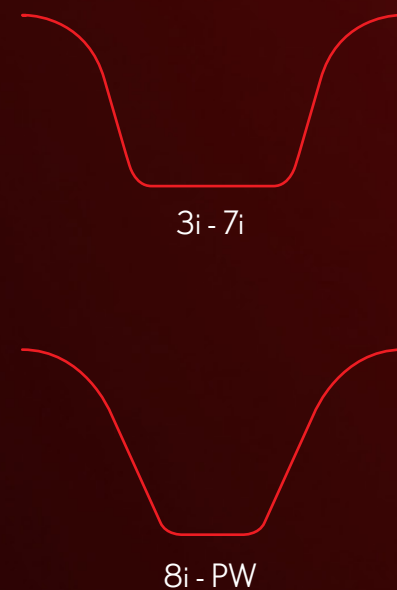

PROGRESSIVE GROOVES

The key to better iron play is consistency. As you move through the lofts, hitting long and short shots from various lies, you need spin, distance, and launch window to remain as consistent as possible.

To that end, ZX5's grooves are progressive. The 3i-7i feature wide grooves, ideal for longer shots in all conditions. While the 8i-PW have deeper, closer set grooves, perfect for cutting through grass and debris on approach shots.

The result is consistency across the set: both long and short irons delivering repeatable, reliable performance, with fewer surprises.

TOUR V.T. SOLE

The unique Tour V.T. Sole gives Srixon irons a leg up against the competition with smoother turf interaction and improved impact feel. The V-shaped sole glides smoothly through turf, even if you strike slightly behind the ball.

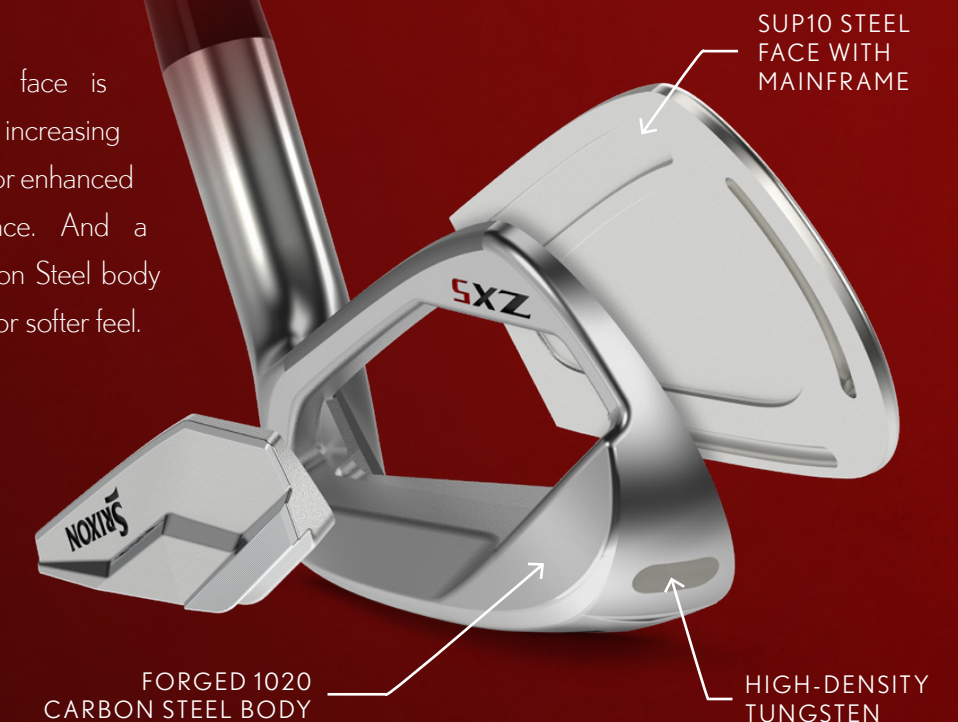

ZX5 Irons also feature the resurgence of our popular sole notches. Revered by our tour staff, these heel and toe notches enhance workability without sacrificing forgiveness.

MULTI-PIECE CONSTRUCTION

Premium, high-density tungsten in ZX5's long and mid irons maximizes heel-toe MOI. That added stability is invaluable on off-center shots because it helps keep spin and speed consistent.

A forged SUP10 face is strong and light, increasing face-flex at impact for enhanced speed and distance. And a forged 1020 Carbon Steel body absorbs vibrations for softer feel.

ZX7

COMPACT. SOFT. WORKABLE.

A players iron that looks and feels like a blade while offering more speed and total control –ZX7 delivers it all.

A compact blade shape, narrow topline, single-piece forging, and narrow sole provide the workability, feel, and aesthetics of a world-class players iron.

3-6

7-PW

AW (Not Shown) is also available

TOUR CAVITY

Skilled players want it all: power, forgiveness, and total control.

To deliver that, Tour Cavity subtly shifts some mass to ZX7's perimeter while also concentrating mass right on the sweet spot.

The resulting performance features slight assistance on off-center strikes, remarkably soft feel, and every ounce of workability demanded by the world's best.

TOUR V.T. SOLE

The unique Tour V.T. Sole gives Srixon irons a leg up against the competition with smoother turf interaction and improved impact feel. The V-shaped sole glides through turf, even if you strike slightly behind the ball.

ZX7 Irons also feature the resurgence of our popular sole notches. Revered by our tour staff, these heel and toe notches enhance workability without sacrificing forgiveness.

PROGRESSIVE GROOVES

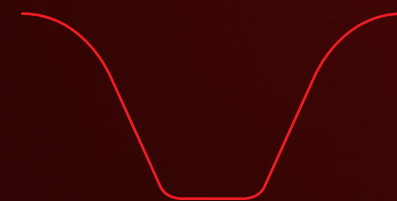

The key to better iron play is consistency. As you move through the lofts, hitting long and short shots from various lies, you need spin, distance, and launch window to remain as consistent as possible.

To that end, ZX7's grooves are progressive. The 3i-7i feature wide grooves, ideal for longer shots in all conditions. While the 8i-PW have deeper, closer set grooves, perfect for cutting through grass and debris on approach shots.

The result is consistency across the set: both long and short irons delivering repeatable, reliable performance, with fewer surprises.

MULTI-PIECE CONSTRUCTION

Premium, high-density tungsten in ZX7's long and mid irons maximizes heel-toe MOI. That added stability is invaluable on off-center shots because it helps keep spin and speed consistent.

A forged 1020 Carbon Steel body absorbs vibrations at impact for buttery soft feel.

HIGH-DENSITY
TUNGSTEN

ZX4

FORGIVING. SOFT. HOLLOW.

Hollow irons offer a sleek, narrow look along with the forgiveness you'd typically only expect from larger designs.

ZX4 Irons deliver an exceptionally good address profile while also boasting our most powerful forgiveness to date. It's a game-changing combination that makes Srixon irons accessible to a whole new class of players that prefers game improvement equipment.

4-7

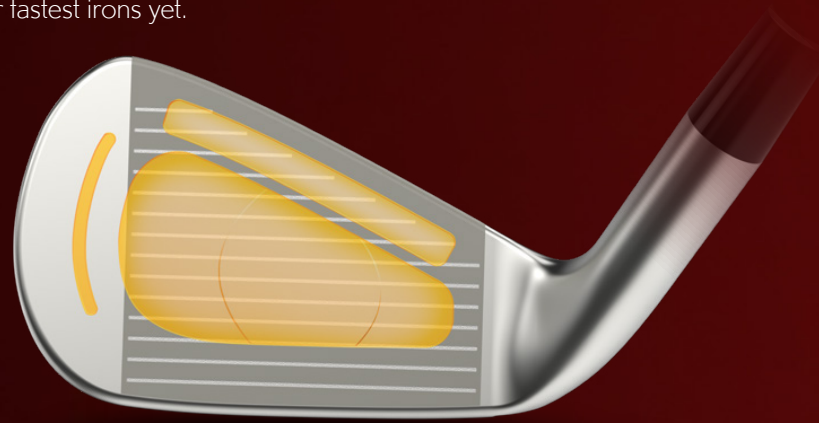

8-AW

MAINFRAME

Created with human intelligence yet perfected by the artificial kind, MainFrame is a one-of-a-kind face design that increases ball speed on every shot. While our engineers set the parameters, our computers ran the simulations—thousands of them—until we had our fastest irons yet.

Milled into the backside of each ZX4 face, MainFrame is a variable thickness pattern made up of grooves, channels, and cavities. This pattern maximizes COR for more ball speed and incredible distance on every shot.

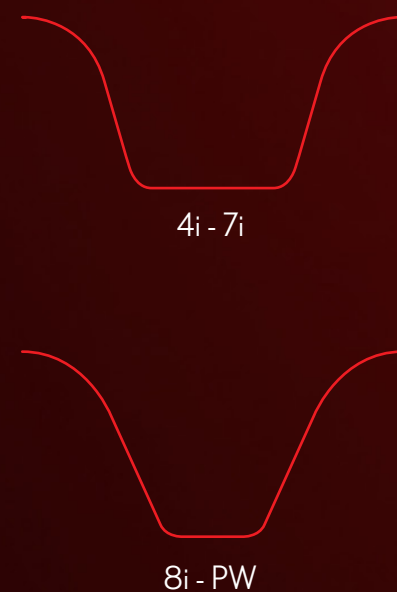

PROGRESSIVE GROOVES

The key to better iron play is consistency. As you move through the lofts, hitting long and short shots from various lies, you need spin, distance, and launch window to remain as consistent as possible.

To that end, ZX4's grooves are progressive. The 4i - 7i feature wide grooves, ideal for longer shots in all conditions. While the 8i-PW have deeper, closer set grooves, perfect for cutting through grass and debris on approach shots.

The result is consistency across the set: both long and short irons delivering repeatable, reliable performance, with fewer surprises.

MULTI-PIECE CONSTRUCTION

Premium, high-density tungsten in the base of ZX4's long and mid irons lowers their centers of gravity significantly. It's the secret to high-launching irons.

A forged HT1770 Steel face is strong and light, increasing face-flex at impact for enhanced speed and distance. And a 431 Steel body absorbs vibrations for softer feel.

HOLLOW DESIGN

Hollow from short to long iron, ZX4 are the most forgiving irons in the ZX Family. They give you the freedom to strike the ball across the face while still enjoying high shots that launch straight and find their targets.

Yet all that forgiveness comes in a palatable shape and sharp address view thanks to the mid-sized profile made possible by ZX4's hollow design.

TOUR V.T. SOLE

The unique Tour V.T. Sole gives Srixon irons a leg up against the competition with smoother turf interaction and improved impact feel. The V-shaped sole glides smoothly through turf, even if you strike slightly behind the ball.

ZX4 Irons also feature the resurgence of our popular sole notches. Revered by our tour staff, these heel and toe notches enhance workability without sacrificing forgiveness.

ZX UTILITY

Tight fairways, windy days, long approach shots—they're all better with a utility iron. Even tour players rely on the added forgiveness and control of these long iron replacements.

The new ZX Utility is smaller, more compact, and more blade-like. It packs added power into a smaller profile, with all the same forgiveness.

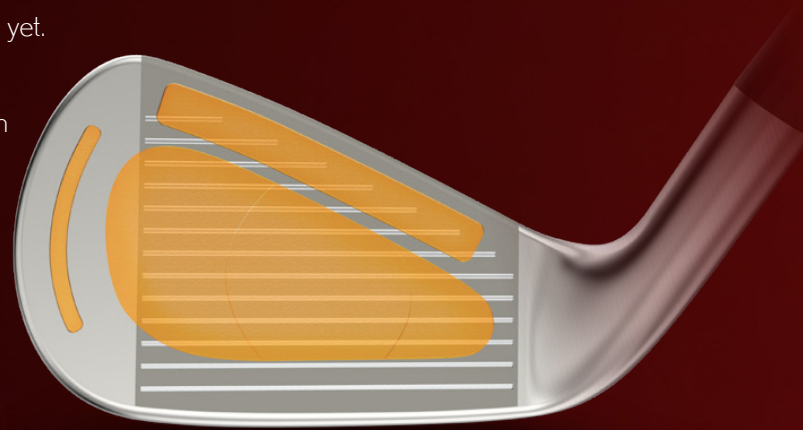

2-4

MAINFRAME

Created with human intelligence yet perfected by the artificial kind, MainFrame is a one-of-a-kind face design that increases ball speed on every shot. While our engineers set the parameters, our computers ran the simulations—thousands of them—until we had our fastest irons yet.

Milled into the backside of each ZX Utility face, MainFrame is a variable thickness pattern made up of grooves, channels, and cavities. This pattern maximizes COR for more ball speed and incredible distance on every shot.

HOLLOW DESIGN

Even for the most skilled players, long iron shots pose a challenge. But the added forgiveness that comes from hollow construction makes it easier to pure your long irons, and that can make all the difference off the tee or when going for the green in two.

MULTI-PIECE CONSTRUCTION

Premium, high-density tungsten in the base of each ZX Utility lowers its center of gravity significantly. It's the secret to making long irons that launch high.

A forged SUP10 face is strong and light, increasing face-flex at impact for enhanced speed and distance. And a forged 1020 Carbon Steel body absorbs vibrations for softer feel.

CUSTOMIZED

Once you pick your iron model, or build your combo set, the real customization begins. Loft, lie, and length are yours to change however you like. And while all the standard components in each ZX Iron are tour-proven, a vast selection of no up-charge options provides a truly bespoke experience.

COMBINATION SET GUIDE

Each ZX Iron set delivers a specific performance profile, with differing degrees of forgiveness, workability, and launch height. However, a great way to maximize these benefits is with our customizable Combination Sets.

Dial in your long and short irons by selecting the models that fit your swing, your strike, and your playstyle. Ultimately, you'll enjoy better golf and lower scores by outfitting your bag with the entire spectrum of Srixon's equipment and technologies.

ZX5 + ZX7 ZERO COMPROMISES

Get it all with an uncompromising combination of distance in your long irons and workability in your short irons. It's the best of two worlds, right in your bag.

Ordered as custom, suggested sets are 3 or 4-6i ZX5, 7-PW ZX7.

ZX7 + ZX UTILITY TOUR PREFERRED

This combo set is most popular with our professional tour staff due to its highly workable short irons and extremely forgiving long irons.

ZX Utilities are available in 2i-4i and usually selected by players seeking extra forgiveness over traditional long irons.

ZX5 + ZX UTILITY MAXIMUM FORGIVENESS

Play with more forgiveness to score your best. This powerful combo set is an unstoppable combination of cavity back short irons and hollow, utility long irons. It's perfect if you prefer to attack the pin head-on.

ZX Utilities are available in 2i-4i and usually selected by players seeking extra forgiveness over traditional long irons.

POWERFUL SHAFTS

We're proud to feature Nippon's N.S. PRO Modus Tour shafts in the ZX5 and ZX7 irons. Their high tip rigidity steadies impact to help minimize unwanted spin, while their less rigid mid and butt sections improve tempo and provide a smooth, comfortable impact feel.

The NS Pro 950 GH Neo neo shaft helps ZX4 irons deliver a high launch and soft landing. The lightweight shaft design promotes an easy swing feel and satisfying follow through while taking full advantage of ZX4's distance-boosting technologies.

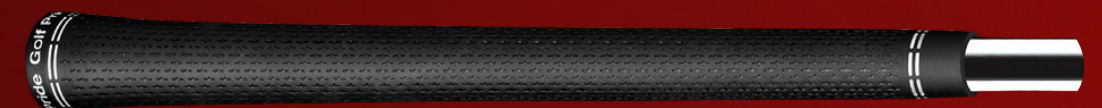

ZX Utilities come standard with Recoil 95 graphite shafts from UST Mamiya. Their Recoil Technology provides a 67% more efficient energy transfer than steel for an optimized spring effect that increases velocity and consistency.

Additional shaft options are available at no-upcharge so you can fully customize ZX Irons to fit your game.

COMFORTABLE GRIPS

Golf Pride Tour Velvet grips are the #1 choice of the world's best. Our 360 version has less intrusive logos along with a state-of-the-art rubber-blend compound and a non-slip surface pattern for maximum playability.

Additional no-upcharge grip choices mean you'll be customizing your new iron set down to the finest detail.

ZX5 IRONS

ZX5 combines pioneering ball speed technology with premium forged feel, and delivers all of it in a forgiving yet workable chassis that's razor sharp at address.

KEY INNOVATIONS:

MAINFRAME

A milled pattern on the backside of ZX5's face maximizes COR for more ball speed and more distance on every shot.

PROGRESSIVE GROOVES

Grooves in the 8i through PW are sharper, narrower, and deeper for more spin and stopping power on approach shots into the green.

TOUR V.T. SOLE

V-shaped soles glide smoothly through turf, even if you strike slightly behind the ball. ZX5 Irons also feature the resurgence of our popular sole notches.

MULTI-PIECE CONSTRUCTION

Tungsten in the toe of ZX5's long and mid irons (3i-7i) increases MOI for more stability and forgiveness. A forged SUP10 face enhances speed and distance while a forged 1020 Carbon Steel body absorbs vibrations for extremely soft feel.

ZX7 IRONS

A compact blade shape, narrow topline, single-piece forging, and narrow sole give ZX7 the workability, feel, and aesthetics of a world-class players iron.

KEY INNOVATIONS:

TOUR CAVITY

Mass repositioned to ZX7's perimeter and sweet spot provides assistance on off-center strikes along with remarkably soft feel.

PROGRESSIVE GROOVES

Grooves in the 8i through PW are sharper, narrower, and deeper for more spin and stopping power on approach shots into the green.

TOUR V.T. SOLE

V-shaped soles glide smoothly through turf, even if you strike slightly behind the ball. ZX7 Irons also feature the resurgence of our popular sole notches.

MULTI-PIECE CONSTRUCTION

Tungsten in the toe of ZX7's long and mid irons (3i-7i) increases MOI for more stability while the forged 1020 Carbon Steel body absorbs vibrations for extremely soft feel.

ZX4 IRONS

ZX4 Irons deliver an exceptional address profile while boasting our most powerful forgiveness. It's a game-changing combination that makes Srixon irons accessible to a whole new class of players.

KEY INNOVATIONS:

MAINFRAME

A milled pattern on the backside of ZX4's face maximizes COR for more ball speed and more distance on every shot.

HOLLOW DESIGN

ZX4's hollow design gives you enough forgiveness to strike the ball across the face while still enjoying high shots that fly straight and find their targets.

MULTI-PIECE CONSTRUCTION

Tungsten in the base of ZX4's long and mid irons (4i-7i) lowers its center of gravity for a higher launch. A forged

HT1770 Steel face enhances speed and distance while a 431 Steel body absorbs vibrations for softer feel.

TOUR V.T. SOLE

V-shaped soles glide smoothly through turf, even if you strike slightly behind the ball. ZX4 Irons also feature the resurgence of our popular sole notches.

PROGRESSIVE GROOVES
